Overview

This report provides a comparison of your school's data across all areas of data collected in DASL with the median values of data in the comparison group you have chosen for the report. The data are displayed as trend lines over a three-year period, as well as tables of values for the year selected.

Some charts incorporate demographic data from the U.S. Census and Community Surveys. These data are supplied by Easy Analytics, Inc., and are displayed for your local economy, based on your choice of geographic location (state, city, zip, etc.).

The report is divided into 12 sections of comparative data and an optional 13th section listing the schools in your selected comparison group. You can run all sections as a complete report or select an individual section as many times as you would like in DASL, selecting a different comparison group each time.

The Introduction to each section gives additional clarification about the content and definitions for that section. For a complete list of the data definitions in DASL, please refer to the [Core Question Definitions](#) document.

Table of Contents:

Databook 2020 Section 12a: Trendbook Demographic Outlook

According to "The Demographic Outlook" in the 2019-2020 NAIS Trendbook: "The country has been living through one of the longest declines in fertility in decades, and demographers are trying to figure out the drivers of this trend. Some experts think that people put off having babies during difficult economic times, but the [Total Fertility Rate] has not recovered since the end of the Great Recession in 2009. Others believe that the decline may result from cultural shifts, such as women getting married later and spending more of their peak fertility years unmarried or delaying having children.

Student Diversity, School Race/Ethnicity: People of Color, Washington city, DC

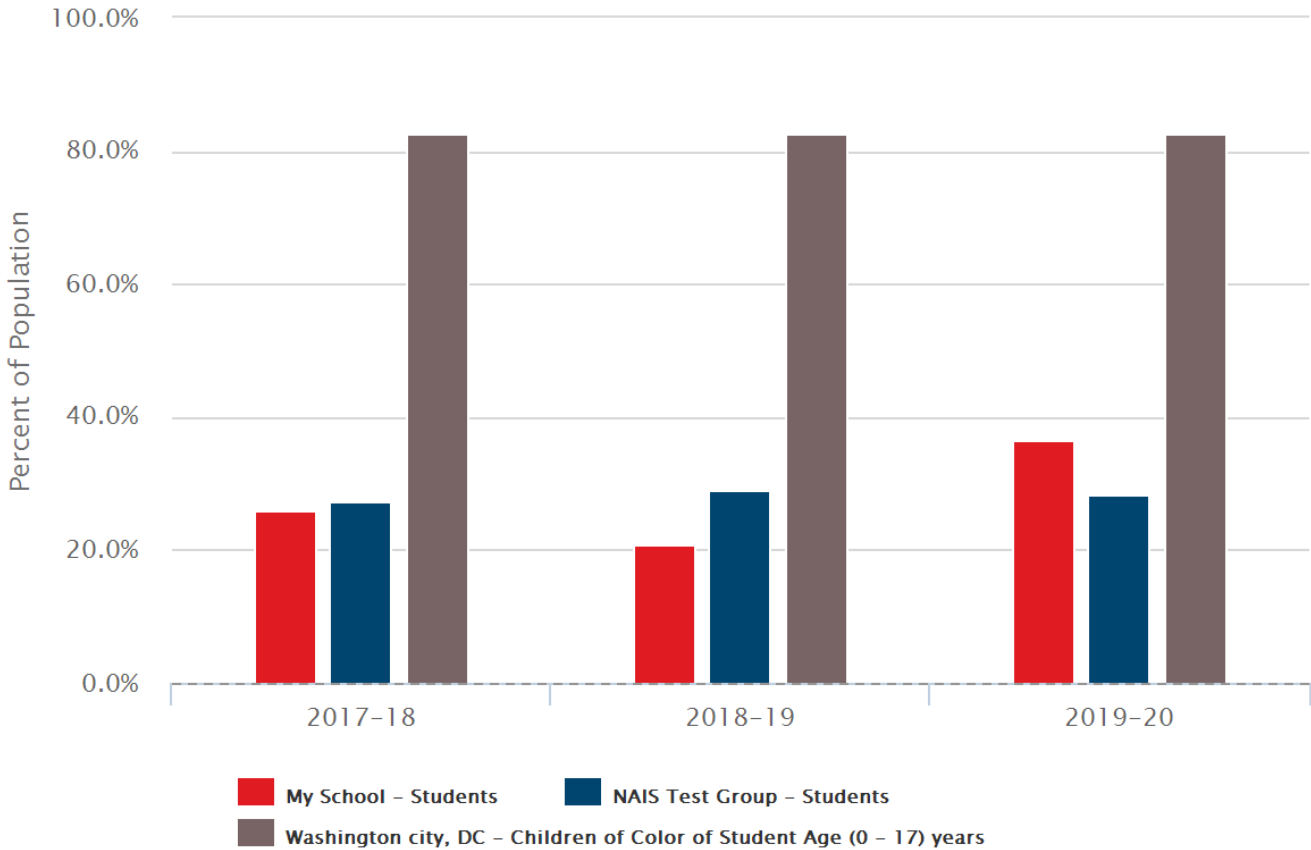

How do the racial and ethnic demographics of your student body compare to that of your community?

This chart displays the percentage of students of color in your school, compared with the median percentage across schools in up to three of your comparison groups, and the percentage of children ages 0-17 in the geography of your choice.

For academic years prior to 2016, DASL has historically included the Latino/Hispanic group in the People of Color (POC) calculation. The Demographic Data comes from the U.S. Census, however, which does not include the Latino/Hispanic group in the POC calculation.

While we will mirror the Census approach in 2016 and beyond, for now please note that the Demographic Data lines on our DASL dashboard include the following groups in the POC calculation: Black, Asian, American Indian, and Two or More races.

New in 2019-20, Individuals are identified by both race and ethnicity. This results in a shift in the display of race and ethnicity for this chart.

Student Diversity, School Race/Ethnicity: Black/African American, Washington city, DC

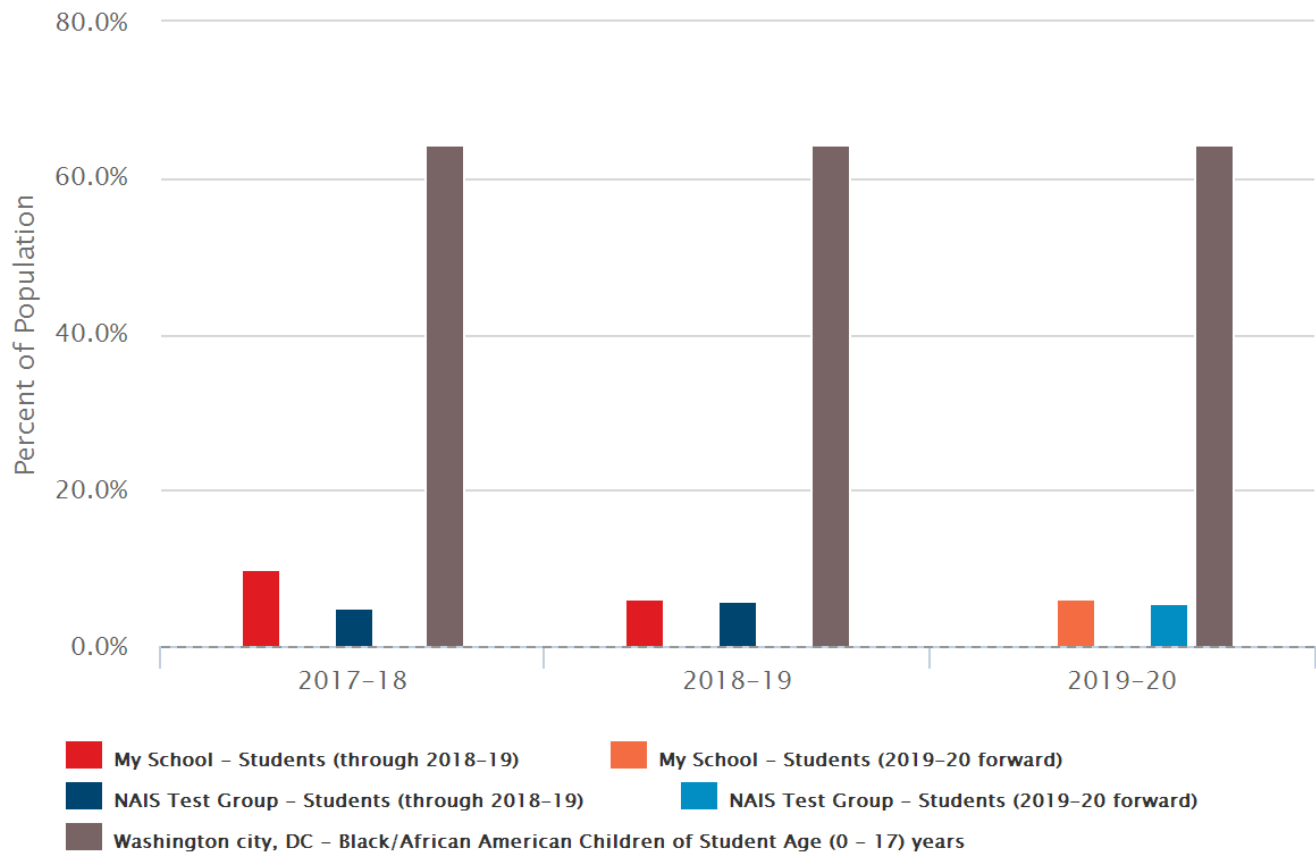

How do the racial and ethnic demographics of your student body compare to that of your community?

How do the racial and ethnic demographics of your student body compare to that of your community?

This chart displays the percentage of Asian American students in your school, compared with the median percentage across schools in up to three of your comparison groups, and the percentage of children ages 0-17 in the geography of your choice.

For academic years prior to 2016, DASL has historically included the Latino/Hispanic group in the People of Color (POC) calculation. The Demographic Data comes from the U.S. Census, however, which does not include the Latino/Hispanic group in the POC calculation.

While we will mirror the Census approach in 2016 and beyond, for now please note that the Demographic Data lines on our DASL dashboard include the following groups in the POC calculation: Black, Asian, American Indian, and Two or More races.

New in 2019-20, Individuals are identified by both race and ethnicity. This results in a shift in the display of race and ethnicity for this chart.

DASL Databook 2020 Section 12b: Trendbook Enrollment Outlook

According to "The Enrollment Outlook" in the 2019-2020 NAIS Trendbook: Nationally, "each grade level in lower school showed declines in enrollment between 2008-2009 and 2018-2019. However, the declines were particularly steep in kindergarten, first grade, and second grade, reaching a double-digit percentage change in each case. Furthermore, this trend seems to have accelerated in the last five years; each grade from first through fifth recorded higher declines between 2013-2014 and 2018-2019 than they did between 2008-2009 and 2013-2014. (Fifth-grade enrollment increased between 2008-2009 and 2013-2014 but then decreased between 2013-2014 and 2018-2019.)"

Databook 2020 Section 12c: Trendbook Tuition and Financial Aid Outlook

According to "The Tuition and Financial Aid Outlook" in the 2019-2020 NAIS Trendbook: "Among all NAIS members, median day school tuition grew 13.6 percent between 2013-2014 and 2017-2018—slower than the 23.9 percent tuition change during the five-year period between 2008-2009 and 2013-2014. Similarly, median boarding school tuition growth in the past five years (15.5 percent) has been more conservative than in the previous half decade (22.7 percent).

How are these trends playing out in your data below?

According to "The Tuition and Financial Aid Outlook" in the 2019-2020 NAIS Trendbook: Nationally, "tuition growth has not only outpaced financial aid. It has also outpaced income growth among families in the top 5 percent of earners across the country—the ones most likely to be full-payers at independent schools."

Rate of change for Day Tuition, Financial Aid, Enrollment and Family Income, Washington city, DC

This chart shows the annual rate of change for day tuition, financial aid, enrollment and family income for your school as well as the median for the selected comparison group over a range of years. Annual percent change is calculated from current and prior year values; if either is missing no value is calculated for that year. Click on "Customize Charts" to select the data collection years and comparison group for which you would like data displayed. Zeros or missing values in charts may represent missing or unsubmitted data, but not all data points are collected for every school (for instance, a day school would not have 7-day boarding tuition data).

Databook 2020 Section 12d: Trendbook Philanthropy Outlook

According to "The Philanthropy Outlook" in the 2019-2020 NAIS Trendbook: Nationally, "schools have seen rapid increases in average gift size across groups. The average has increased by 8 percent after inflation since 2013-2014, with gifts from alumni and parents of alumni increasing by 27 percent and 26 percent, respectively. The exception to this trend is current parents, whose average gift has slightly decreased after inflation. This may make sense given an increase in average tuition of 7 percent after inflation over this time period."
